

# Peace 2030

The 7 actions that brought the world together as one are now the Peace on Earth by 2030 Movement and Game. The Game is a grand experiment to duplicate the success of the First Earth Run by creating Peace on Earth through mass collaboration, empowerment, and collective intention. In the modern era we don't have to physically take a torch around the world: we can pass it person to person, from town to town, with the assistance of technology.

We are not talking about a board game or a video game. Your life is the game! You and your team harnesses empowerment, behavioral strategies, and accountability to create more peace in yourselves and in the world. The idea is to have forty million people having played the game by 2030, tipping the global consciousness toward peace.

Regions playing the game become POE Zones, where players collaborate to create the world they'd like to see, from the inside out, starting in their own backyards. Louisville is developing one of the planet's first POE Zones and Unity of East Louisville is helping lead the charge.

To learn more about the Peace on Earth by 2030 Game and to register to play, visit [peace2030.earth](http://peace2030.earth)

To connect with the Louisville POE Zone contact Suzanne De Gregorio and Tracy Jackson at [poezonelou@gmail.com](mailto:poezonelou@gmail.com).
